

Claims System Application

The Claims Management Platform is designed as a generic and configurable workflow solution that supports claims, requests, complaint management, and future ticketing processes. The system integrated Microsoft Entra ID and Microsoft Graph API to align with the BYD organizational hierarchy and approval structure

1. Integrated Microsoft Graph API. (Whole Organization Wide)
2. This is the Designation title's screen that consists of the basis of Department.

Generic & Configurable Form & Document Builder

Purpose

To design a generic, configurable, and scalable form builder that enables the creation of any business form, claim, request, or ticketing workflow through configuration rather than development effort. Users or administrators define the required form fields and rules, and the system dynamically generates the corresponding user interface and document structure.

Supported Components

Text Fields

Radio Buttons

Checkboxes

Dropdown Lists with configurable options

Date Pickers

Nested/Repetitive Detail Sections (Array Fields)

Document Upload Categories

Dynamic Validation Rules

Email Format Validation

Additional Detail Sections

Benefits

Eliminates hardcoded forms.

Reduces development effort for new business processes.

Enables rapid onboarding of new claim and request types.

Improves maintainability and scalability.

Provides consistent user experience across all workflows.

The screenshot displays the 'Workflow Configuration' interface. On the left is a dark sidebar with navigation links: 'Kumail Ali', 'CLAIMS' (with sub-links 'Create Claim', 'My Claims', 'All Claims', 'Dashboard'), 'REPORTS' (with sub-links 'Claim Reports', 'Audit Log'), 'ACCESS CONTROL' (with sub-links 'Roles & Assignments'), 'FORM BUILDER' (with sub-link 'Workflow Configuration'), 'LOGOUT', and 'Sign Out'. The main content area is titled 'Workflow Configuration' and has two tabs: 'Generic Form Builder' (active) and 'Approval Matrix'. Below the tabs is the 'Edit Claim Type/Request Ticketing Form' section. It includes a dropdown for 'Expense Claim Form (EXPENSE_CLAIM_FORM)' with a '+ Start New Instead' link, and a text field for 'Expense Claim Form'. Below this is a 'Row 1' section with a 'Remove Row' button. It contains four form fields, each with a 'Label', a 'Type' dropdown, and a 'Remove This Field' button: 1. Label: 'Employee Id', Type: 'Number'. 2. Label: 'Claimant's Name', Type: 'Text'. 3. Label: 'Department', Type: 'Text'. 4. Label: 'Date', Type: 'Date'.

The screenshot displays the 'Workflow Configuration' interface. On the left is a dark sidebar with navigation links: 'Rumail AI', 'CLAIMS' (with sub-links 'Create Claim', 'My Claim', 'All Claims', 'Dashboard'), 'REPORTS' (with 'Claim Reports'), 'AUDIT LOG', 'ACCESS CONTROL' (with 'Roles & Assignments'), 'FORM BUILDER' (with 'Workflow Configuration' highlighted), 'LOGOUT', and 'Sign Out'. The main area shows a form builder with four rows of fields. Each row has a 'Label' input and a 'Type' dropdown menu. Below each row is a 'Remove This Field' button. The fields are: 'Details of Expenditure' (Text), 'Receipt No.' (Number), 'Amount' (Number), and 'Charge Head A/C' (Text). Below the form builder is a 'Required Documents (per claim/request sub-type)' section. It contains a table with columns for 'Document Category', 'Document', and 'Remove'. The first row has 'expense' in the first column, 'fuel_card' in the second, and 'Remove Document Category' in the third. The second row has 'fuel_card' in the first column, 'Fuel Card' in the second, and 'Rumail AI' in the third. Below the table are buttons for '+ Document' and '+ Document Category'.

Dynamic Approval Workflow

The Dynamic Approval Workflow Engine serves as the core component of the system, responsible for defining, managing, and executing approval processes for claims, requests, and future business transactions. Through a configurable Approval Matrix, the system dynamically determines the approval hierarchy based on predefined business rules, claim types, departments, and workflow configurations.

Key Features

Dynamic loading of Claim Types through configurable form builder.

Configurable Approval Matrix to define approval chains for each Claim Type and multiple departments along its approvers.

Support for different departments and their approvers within a single workflow stage or across multiple stages.

Workflow activation and deactivation controls for managing active approval processes.

Mandatory approval and rejection comments to ensure transparency, accountability, and audit compliance.

Dynamic email requests based on configured business rules.

Scalable architecture supporting multi-level, multi-department, and future approval scenarios.

Complete audit trail for approval decisions, comments, and workflow actions.

Business Benefits

Eliminate hardcoded approval hierarchies.

Enables business users to manage approval workflows through configuration.

Supports complex organizational approval structures.

Improves governance, compliance, and process transparency.

Reduces development effort when introducing new claim types and workflows.

The screenshot displays the 'Workflow Configuration' interface. On the left is a dark sidebar with the user 'Kumail Ali' at the top. Below the name are sections: 'CLAIMS' (with links for Create Claim, My Claim, All Claims), 'Dashboard', 'REPORTS' (with Claim Reports), 'Audit Log', 'ACCESS CONTROL', 'Roles & Assignments', 'FORM BUILDER' (with Workflow Configuration selected), and 'LOGOUT' (with Sign Out). The main content area is titled 'Workflow Configuration' and has two tabs: 'Generic Form Builder' and 'Approval Matrix' (which is active). In the top right of the main area is a '+ New Rule' button. Below the tabs is an 'Approval Matrix' section with a search bar. There are two filter sections: 'CLAIM TYPE' and 'APPROVER ROLE', each with a 'Filter...' input. The matrix itself is a table with two columns: 'CLAIM TYPE' and 'APPROVER ROLE'. The rows are: CARTAGE_CLAIMS, DRESS_CLAIMS, APPROVAL_MATRIX, CONFIGCLAIMS, TEA_CLAIMS, DATA_LAKE_CLAIMS, PENCLAIMS, GLASS_CLAIMS, OFFICE_CLAIMS, and MULTI. The 'APPROVER ROLE' column contains workflow paths like 'Deputy Manager Full Stack Developer -> Deputy Manager Data Engineer -> Deputy Manager Financial Reporting'. At the bottom of the table are pagination controls: 'First', 'Previous', '1' (selected), '2', '3', '4', '5', 'Next', 'Last', and 'Reset Filters'.

CLAIM TYPE	APPROVER ROLE
CARTAGE_CLAIMS	Deputy Manager Full Stack Developer -> Deputy Manager Data Engineer -> Deputy Manager Financial Reporting
DRESS_CLAIMS	Deputy Manager Full Stack Developer -> Deputy Manager Financial Reporting
APPROVAL_MATRIX	Deputy Manager Full Stack Developer -> Deputy Manager Financial Reporting

Claimant Portal

This section allows claimants to create and submit claims. Users can select a claim type from the configured dropdown list, complete the required information, upload supporting documents, and submit the claim for approval.

Key Features:

Loaded claim types are displayed in the dropdown list. These claim types are configured through the Form Builder and dynamically generate the corresponding form schema based on the selected claim type.

Claims Supported Documents Attachment

This is the claim document panel for the supported attachments.

The screenshot displays a web application interface for managing claims. On the left is a dark sidebar with a user profile 'Kumail Ali' and a menu including 'CLAIMS' (with 'Create Claim' highlighted), 'My Claim', 'All Claims', 'Dashboard', 'REPORTS' (with 'Claim Reports', 'Audit Log', and 'ACCESS CONTROL'), 'FORM BUILDER' (with 'Roles & Assignments' and 'Workflow Configuration'), and 'LOGOUT' (with 'Sign Out'). The main content area is titled 'New Request / Claim - HouseClaims' with a 'Saved 11:15:43 AM' status. Below the title are three tabs: '1. Claim Details', '2. Documents' (active), and '3. Review & Submit'. The '2. Documents' tab shows a section for 'Required Documents (1)' with a '0 / 1 Uploaded' indicator. A document entry 'Expense Claims (kumayl ali)' is listed with a 'Pending' status and an 'Upload' button. Below this, a file 'Claim Management Structure.pdf' (380.9 KB) is shown with a 0% progress bar and a 'Remove' button. At the bottom right are 'Back' and 'Continue' buttons.

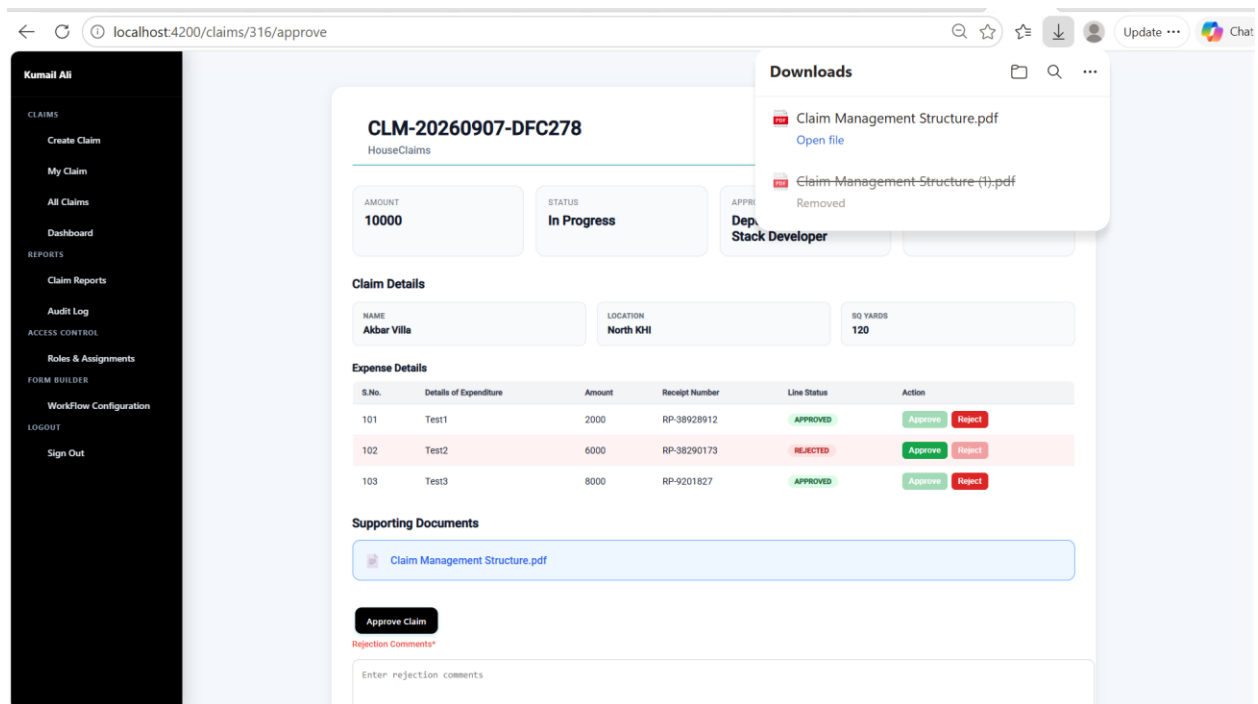

Claim Execution Chain via the email

Once a claim is submitted, it follows the configured Approval Matrix and is sent to approvers one by one via email until the approval process is completed.

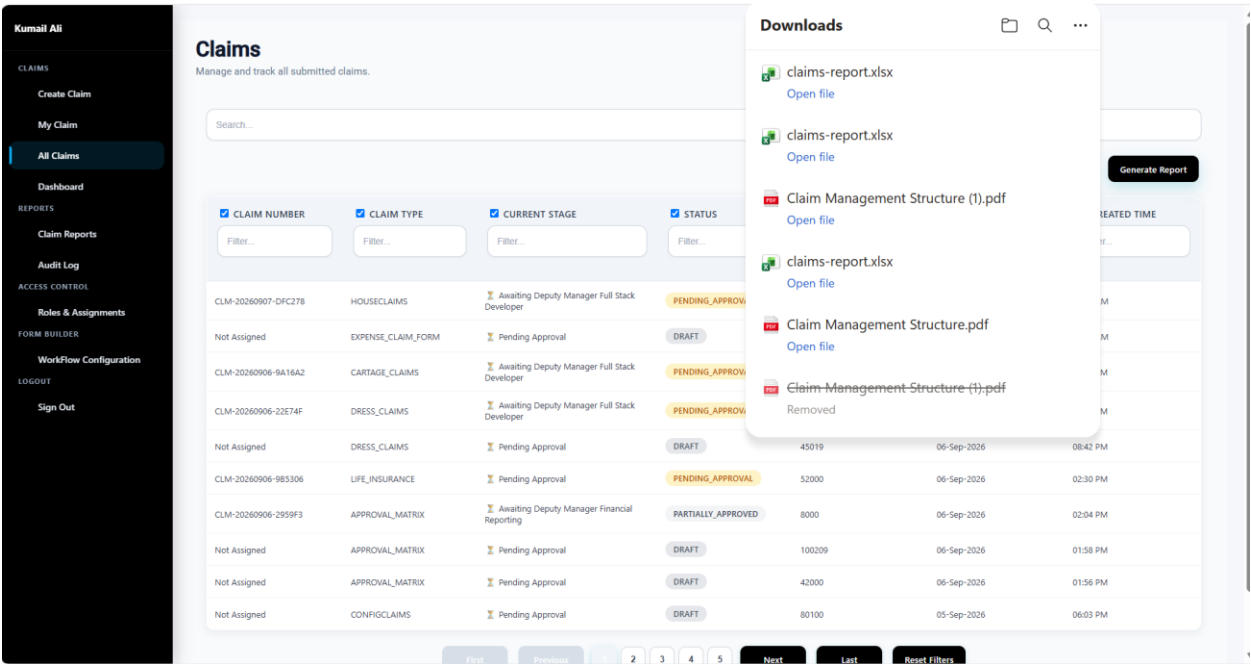

Claim Approval Screen

This is the claim approval screen which will receive to approver through the email. An approver can approve or reject the claim in line wise as per their own decision

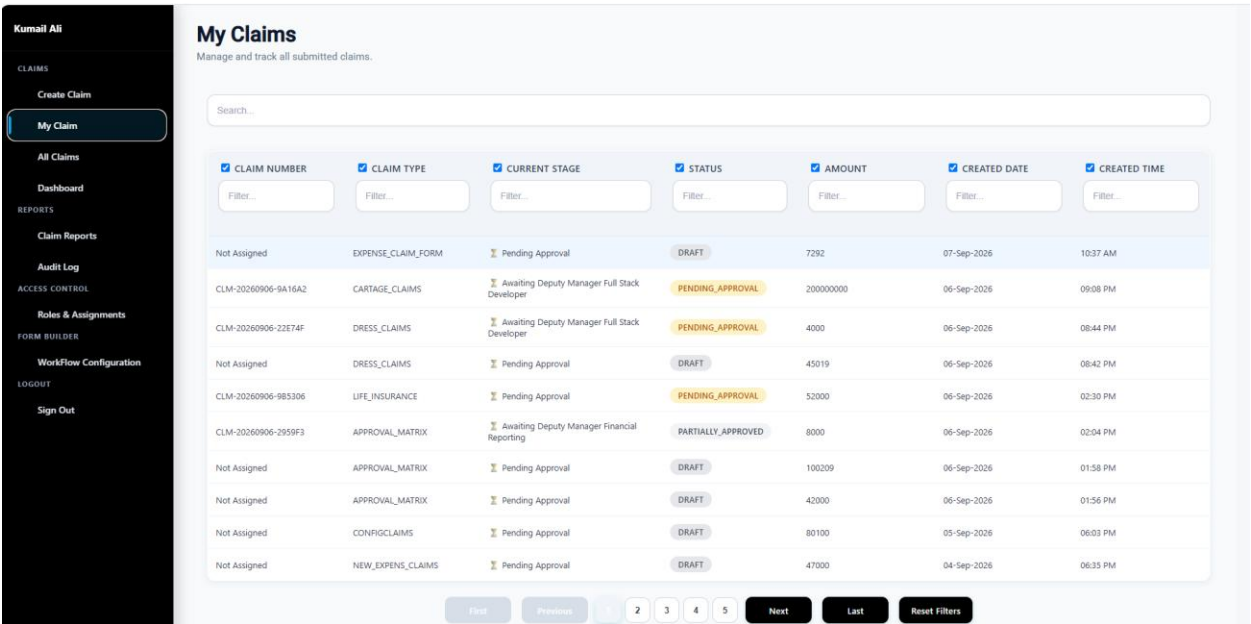

Claims Listing (Administrator)

This is the Claims Listing part where the Administrator can see all the claims and their current stages.

Claims Listing (Claimant Person)

This is for the claims listing where claimant person can view their claims and their stages.

Audit Trails (Administrator)

This is Audit trail screen where the Administration can monitor the operations and the activities of the claimant user.
